SUMMARY

Software engineering student currently completing a preparatory cycle in computer science and transitioning into an engineering degree. Seeking a summer internship in full-stack development or artificial intelligence to strengthen skills in software architecture, front-end and back-end development, databases, and algorithmic problem solving. Currently expanding knowledge in AI and data science through self-study and certifications.

EDUCATION

Preparatory Cycle in Computer Science	2024 – 2026
ISIMM	
Relevant Coursework: Algorithmics, Data Structures, Programming	
Engineering Degree in Software Engineering (Expected)	2026 – 2029
ISIMM	

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, C, C++, PHP

Web: React, Node.js, Express, HTML, CSS

Databases: MongoDB, PostgreSQL

Tools: Git, GitHub, UML, REST APIs

PROJECTS

FoundIt ISIMM	MERN
- Built a full-stack Lost & Found platform for my college using the MERN stack - Implemented RESTful APIs to handle CRUD operations for managing lost and found items	
Gym Website	React, Tailwind CSS
- Developed a responsive fitness website with reusable UI components - Optimized performance and ensured accessibility across devices	
Portfolio Website	
- Designed and developed a personal portfolio showcasing projects - Applied animations, performance optimization, and responsive design	
Stock Management System	JavaFX, PostgreSQL
- Developed a desktop application for inventory management - Designed relational database schema and UML diagrams	

TECHNICAL ACTIVITIES

- Participated in hackathons focused on web development and problem solving
- Active problem solver on Codeforces
- Participated in university and national programming contests
- Contributed to collaborative projects on GitHub

CERTIFICATIONS

- Participation in workshops: Artificial Intelligence, Web Development, Problem Solving
- Currently pursuing Full-Stack Development Certification (freeCodeCamp)
- Currently preparing for Data Science certifications (NVIDIA)
